

## Connecting The Dots

Are you an AI enthusiast, or nonprofit funder? If so, you need to be aware of Nonprofit Dot Connectors.

Nonprofit Dot Connectors comprise a philanthropic ecosystem that is helping nonprofits take their impact to a dramatically higher next level. The nonprofit dot connecting mission is simple. It is to secure funding and donations of AI-powered products and training . . . and then make those resources available, and affordable, for more than 10 million nonprofits around the world.

Dot Connecting organizations are driven by a clear understanding that cutting-edge AI tools can dramatically increase operational capacity. And they can reliably measure program impacts to assure that every dollar, and every hour invested generates the greatest possible impact.

I am working with Propel Philanthropy to connect visionary funders and AI product and service producers, and Nonprofit Dot Connectors, who share our belief in the power of AI technology to transform the social sector. I would be grateful for the opportunity to share more about our mission and discuss how we can work together to build a more impactful and sustainable future.

Thank you for your time and consideration.

With appreciation,

Dr. Bob (AKA Robert Roth, PhD)
